WELCOME MESSAGES

WELCOME MESSAGE

from

**Chairperson
of PERDAMI**

Dear Honored Guests and Participants,

With great pride and joy, I extend a warm welcome on behalf of the Indonesian Ophthalmologists Association to the PIT-KONAS PERDAMI 2025. Your presence here reflects our shared commitment to strengthening collaboration, exchanging knowledge, and fostering innovations that bring meaningful benefits to society.

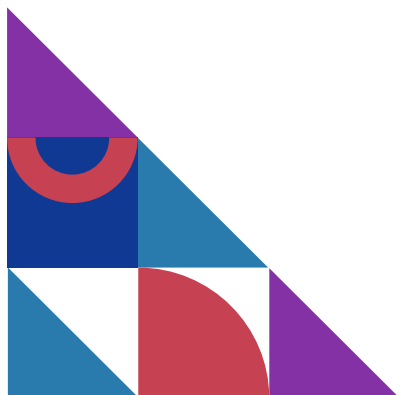

We hope this event will serve not only as a platform for knowledge sharing but also as an opportunity to expand professional networks and create new collaborations that drive collective progress. Let us make the most of this valuable moment to learn, engage in discussions, and inspire one another.

Thank you for your participation and enthusiasm. Wishing you a rewarding experience and meaningful insights throughout the event.

Warm regards,

Prof. Budu, MD., M.Med.Ed., Ph.D

Treating a wide range of patients with a unique ZEISS Optic.

ZEISS CT LUCIA 621P/PY

The CT LUCIA from ZEISS is an aspheric monofocal IOL in the hydrophobic ZEISS cataract portfolio.

With excellent stability, an improved injector system and a design that is uniquely forgiving to decentration, it delivers consistent visual outcomes* for a broad range of patients and surgical situations.

Benefit from:

- **Consistent visual outcomes*** thanks to the patented ZEISS Optic (ZO) Asphericity Concept
- **Excellent stability** through the use of an optic-haptic junction and step-valued C-loop haptic
- **Intuitive injector handling** due to latest improvements to the fully preloaded injector system

*The data is taken from a simulation. The transferability of the results of such a simulation to patients with an actual implanted intraocular lens has not yet been scientifically proven. Whether the simulated impressions correspond to the actual visual impressions must be clarified in future in vivo studies.

INFORMATION FOR SPEAKERS

INFORMATION FOR SPEAKERS

Speaker Ready Room at 2nd Floor

The Speaker Ready Room is located on the 2nd floor of The Trans Luxury Hotel Bandung. From there, all presentations will be distributed to the respective session rooms from this location. Technicians will be available to assist with any compatibility or formatting issues you may encounter.

Speakers are requested to upload their presentation slides via the Google Form link provided in the **Speaker Guidelines** sent by the committee via email, **no later than 7 days before** their scheduled presentation.

Please download the official PowerPoint template and access detailed presentation guidance from our website: <https://pit50.perdami.or.id/pages/speaker-guidelines/27>

If you need to make updates to your slides, you may do so at the **Speaker Ready Room**, but no later than **3 hours before** your session begins. Please note: uploading or modifying presentations directly in the session rooms is **not permitted**

Important:

If your presentation includes videos, audio clips, or other multimedia elements, please inform the technician in the Speaker Ready Room when uploading your presentation. This allows them to prepare and provide necessary support in your session room.

Disclosure Of Conflict(s) Of Interest

All speakers should declare any conflict(s) of interest or lack thereof in all their presentations.

Presentation Format

- All presentations will be displayed using **PowerPoint** or **Acrobat Reader 10 for PC**
- The presentations **must be in 16:9 widescreen format**; please select this setting before you begin creating your slides.
- PowerPoint for MAC users are advised to test their files on a PC prior to the event to ensure compatibility.
- **Keynote presentations are not be supported.** If using Keynote, please export your file to PowerPoint format.
- **Personal laptops cannot be used** during the presentation. All files must be uploaded and run from the event system.

INFORMATION FOR SPEAKERS

Audio Transmission Is Not Supported

Please use pointer/spotlight provided at the speaker's podium to operate your own presentation. Note: The computer on which the presentation is stored is not situated at the podium. Important note: Please save data in accordance with the notes below and store data on a USB flash memory device. At the Speaker Ready Room, please provide the AV staff with your name and the session(s) you will be speaking in.

Time Keeping Protocol

Speakers should be in the meeting room at least 30 minutes before the scheduled time. The meeting program is intensive and keeping to schedule is essential. Session chairs will be strict with timekeeping. Speakers should take note of the time keeping protocol.

avansee™preload1P
TORIC

THE NEXT GENERATION TORIC IOL

Avansee Preload1P Toric retains the spherical aberration of the eye and also offers PAC technology.

The degree of astigmatism is not uniform across the cornea.¹

The unique PAC technology delivers greater cylinder power at the centre of the cornea, where the astigmatism is more pronounced, and less cylinder power at the periphery where the astigmatism is lower.²

Avansee Preload1P Toric corrects astigmatism where necessary and minimises over correction.²

Proven lens rotational stability: Median rotation 1.54° [Mean 2.12°]³

Avansee Preload1P Toric has oval and visible axis marks that allows easy lens alignment.⁴

Please visit the Avansee Toric Calculator web page below for more information:
